

The following text is about the account payable process. It begins when you send to the receiving department.

Once sending to the receiving department occurs, you need to create a receiving report.

When creating a receiving report is completed, one or more of the following paths should be executed: gathering the receiving report, gathering the vendors invoice.

Then, the process is split into 3 parallel branches: stamping all documents, checking dates to avoid penalty charges and scheduling the payment.

The process is now completed.
