

The following description is about the account payable process. It starts with sending to the receiving department.

When sending to the receiving department is completed, you need to create a receiving report.

Once creating a receiving report occurs, the next tasks should be confirming all documents have been amended and doubling check a three-way match, they should be done in parallel.

Once all pre-tasks are executed, then the process is split into 2 parallel branches: creating voucher for the documents and storing in paid invoice file.

Once creating voucher for the documents occurs, one or more of the following paths should be executed: stamping all documents, scheduling the payment.

After scheduling the payment, entering the invoice into the accounts payable account should be done.

After storing in paid invoice file, checking dates to avoid penalty charges should be done.

The process is now completed.
