

The following description is about the account payable process. It begins when you send to the receiving department.

Once sending to the receiving department occurs, you need to create a receiving report.

When creating a receiving report is completed, the process is split into 2 parallel branches: gathering the receiving report and gathering the vendors invoice.

After gathering the receiving report, you need to double check a three-way match.

Once all pre-tasks are executed, then one or more of the following paths should be executed: storing in paid invoice file, creating voucher for the documents.

The process is now completed.
