

The following text is about the account payable process. It begins when you send to the receiving department.

When sending to the receiving department is completed, creating a receiving report needs to be done.

After creating a receiving report, the process is split into 2 parallel branches: confirming all documents have been amended and gathering the receiving report.

Once gathering the receiving report occurs, the process is split into 2 parallel branches: reporting errors to relevant team member and doubling check a three-way match.

When reporting errors to relevant team member is completed, gathering the vendors invoice needs to be done.

Once all pre-tasks are executed, then one or more of the following paths should be executed: storing in paid invoice file, scheduling the payment.

The process is now completed.
