

The following description is about the account payable process. It begins when you send to the receiving department.

When sending to the receiving department is completed, creating a receiving report should be done.

Once creating a receiving report occurs, you need to confirm all documents have been amended.

After confirming all documents have been amended, the process is split into 2 parallel branches: creating voucher for the documents and entering the invoice into the accounts payable account.

After creating voucher for the documents, checking dates to avoid penalty charges needs to be done.

When entering the invoice into the accounts payable account is completed, one or more of the following paths should be executed: storing in paid invoice file, stamping all documents, scheduling the payment.

The process is now completed.
