

The following text is about the account payable process. It starts with sending to the receiving department.

When sending to the receiving department is completed, creating a receiving report needs to be done.

After creating a receiving report, the process is split into 2 parallel branches: doubling check a three-way match and reporting errors to relevant team member.

Once reporting errors to relevant team member occurs, you need to gather the vendors invoice.

Once all pre-tasks are executed, then one or more of the following paths should be executed: entering the invoice into the accounts payable account, stamping all documents, checking dates to avoid penalty charges.

The process is now completed.
