

The following description is about the account payable process. It begins when you enter purchase order details.

Once entering purchase order details occurs, creating a receiving report needs to be done.

When creating a receiving report is completed, one or more of the following paths should be executed: reporting errors to relevant team member, doubling check a three-way match.

After that, one or more of the following paths should be executed: storing in paid invoice file, checking dates to avoid penalty charges.

The process is now completed.
