

The following description is about the account payable process. It begins when you send to the senior accountant in your department.

Once sending to the senior accountant in your department occurs, you need to create a receiving report.

When creating a receiving report is completed, the next tasks should be doubling check a three-way match and gathering the receiving report, they should be done in parallel.

After doubling check a three-way match, the process is split into 2 parallel branches: reporting errors to relevant team member and gathering the vendors invoice.

After gathering the vendors invoice, you need to confirm all documents have been amended.

Once all pre-tasks are executed, then you need to store in paid invoice file.

The process is now completed.
