

The following description is about the account payable process. It begins when you send to the vendor accounting department.

When sending to the vendor accounting department is completed, creating a receiving report needs to be done.

After creating a receiving report, the process is split into 2 parallel branches: reporting errors to relevant team member and doubling check a three-way match.

Once reporting errors to relevant team member occurs, you need to confirm all documents have been amended.

Once all pre-tasks are executed, then you need to check dates to avoid penalty charges.

The process is now completed.
