

The following description is about the account payable process. It starts with sending to the senior accountant in your department.

Once sending to the senior accountant in your department occurs, you need to create a receiving report.

After creating a receiving report, one or more of the following paths should be executed: doubling check a three-way match, reporting errors to relevant team member, confirming all documents have been amended.

Afterwards, the process is split into 3 parallel branches: scheduling the payment, stamping all documents and storing in paid invoice file.

After stamping all documents, you need to enter the invoice into the accounts payable account.

The process is now completed.
