

The following text is about the account payable process. It starts with entering purchase order details.

After entering purchase order details, creating a receiving report should be done.

Once creating a receiving report occurs, the process is split into 2 parallel branches: confirming all documents have been amended and reporting errors to relevant team member.

Once all pre-tasks are executed, then one or more of the following paths should be executed: scheduling the payment, stamping all documents.

The process is now completed.
