

The following text is on the account payable process and starts with the sending department.

When the sending process to the receiving department is completed, a receiving report needs to be created.

After creating a receiving report the process is split into two parallel branches : doubling a three-way match & reporting errors to relevant team member.

Once reporting errors to the relevant team member occurs, you need to gather the vendor invoice.

Once all pre-tasks are executed, one or more of the following steps should be done: entering the invoice into the accounts payable account, stamping all documents, checking dates to avoid penalty charges.

The process is now completed.
