

The following is about the credit reporting process which begins when you send to the senior accountant in your department.

When the sending to the senior accountant in your department is completed, a receipt report needs to be produced.

When the creation of a receiving report is completed, the next task should be to report errors to the appropriate team member and gather the vendors invoice, which should be done in parallel.

Once all pre-tasks are executed, then one or more of the following paths should be executed : in the paid invoice file, checking the dates to avoid penalty charges.

Now, the process is complete.
