

The following is about the purchase process, which starts when you enter the order details.

Once the details of the purchase are entered you need to create a receiving report.

Once a receiving report occurs, the next tasks should be doubling a three-way match and collecting the receiving report. This should be done in parallel.

When the doubling check is completed a three-way match, confirming all the documents have been amended must be done

After all pre-tasks are completed, then data checks should be done to avoid penalties.

The process is now finished.
