

The text below is about the account payable process which starts with the entering of the order details.

After entering the purchase order information, a receiving report needs to be created.

Once a receiving report appears, the collect of the vendor invoice should be done.

Once collecting the invoice of the vendors occurs, one or more of the following paths should be executed : creating vouchers for the documents, checking date to avoid penalty charges, storing in paid invoice file.

The process is now complete.
