

The following is a description of the account payable process : It starts with the payment details.

After entering the purchase order details, the sending report should be created.

Once creating a receiving report is completed, the process is split into 2 parallel branches : confirming that all documents have been amended and reporting errors to the relevant team member.

Once all pre-tasks are executed then one or more of the following routes should be executed: scheduling payment, stamping all documents.

The process is now completed.
