

The text below is about the payment process. It starts with entering the order details.

Once the purchase order details are entered, a receiving report must be created.

The receiving report should be collected after the reporting is created.

When the collecting is completed, the process is divided into 2 parallel branches : checking date to avoid penalty charges and entering invoices into the account payable.

Once the check of dates is to avoid penalties, the creation of a voucher for documents is also necessary.

Now the process is completed.
