

The text below is about the creditor process which begins when you send to the receiving department.

After receiving to the receiving department, creating a reception report needs to be done.

When a receiving report is created, the process is divided into 2 parallel branches: acquiring the vendor invoice, and assembling the receiving report.

When gathering the vendor invoice is completed, the process is split into 2 parallel branches: reporting errors to the relevant team member and confirming all documents have been modified.

After reporting errors to the appropriate team member, a three-way match needs to be checked double.

Once all pre-tasks are executed, the process is split into 2 parallel branches : entering invoices into accounts payable account and storing in paid invoice file.

The process is now complete.
