

The text below is about the invoice process, and starts with a copy for internal records.  
When filing a copy for internal records is completed, the creation of a receiving report should be done.  
After creating a receiving report you will collect the vendors' invoice.

After gathering the invoice of vendors, the process is divided into 3 parallel branches : entering invoice into the account payables account, creating a coupon for the documents and analyzing dates to avoid penalty charges.  
The process is now complete.
