

The following is a description of the Account payable Process, which begins when you send to the Receiving department.

Once sending occurs to the receiving department, you need to create a receipt report.

When the creation of a receiving report is completed, the process is divided into 2 parallel branches : the receiving report and the vendor invoice.

After gathering the receipt report, you need to double check a three-way match.

Once all pre-tasks are executed, one or more of the following paths should be executed: storing in a paid invoice file, creating voucher for the documents

The process is now complete.
