

The following description is about the accounts payable process, which begins with submitting a copy for internal records.

After filing a copy for internal records, create a receiving report should be done.

When a receiving report is completed, one or more of the following paths should be executed: acquiring the vendor invoice, reporting errors to the relevant team member.

After reporting errors to the relevant team member, doubling check a three-way match should be done.

Afterwards, you need to enter the invoice into the payable account.

The process is now complete.
